

**Jorge Mendes**

Full Stack Developer

**São Paulo, Brazil**

Dear Recruiter's

I always wanted to work on your organization, I think that your job makes the world better, and keep searching for a company that thinks out of the box like ours. So I see that your company are hiring and decided to take a chance. I am positive that I can help rebuild the way that web is made today. It's almost five years now that I work with web development and I build a lot of projects, worked with IOT, Real time, REST, GraphQL, SQL, MongoDB and a lot of more things.

In my current position at FDTE, I acted as consultant at Lendico, a company that provide a user get a loan in an easy way, all digital. My team and I, rebuild all the front-end of the platform using a single stack, and solved a lot of problems that the old platform had, doing it, with a stack that is easy to maintain and build new features.

Now I want to challenge more, so I would welcome the chance to become part of your staff.

Kind Regards,

Jorge Mendes.
